

drones, loves, honesties, sounds

a silber label sampler

Silber has been slowly cranking out releases since 1996. Putting out indie records in a number of styles from drone-pop to darkwave to post-rock to americana to soundscapes & building a musical community not exclusive to a single niche.

drones, loves, honesties, sounds contains tracks from 22 releases & 19 artists on Silber since 1999. We could go into a million details about every track & every artist, but we feel the music speaks strongly for itself & lets you know what you need to hear more of.

So enjoy the music & become part of our Silber family.
