stars whisper

“Chilly spacious distance with random muted industrial movements in dense fog. Full & shrouded in supernatural mystery. Cold empathic visions of the beginnings & endings of the universe. Subtly warm reassurances of far away factories humming with artificial life. Ice as far as the eye can see, the wind murmurs like ghosts.”

~ George Parsons, Dream Magazine

Stars Whisper is a collection of three live songs from Northern Valentine, recorded in their hometown of Philadelphia with a line-up of Robert Brown, Amy Brown, Jeffrey Bumiller, & Marc Carazo. The individual tracks were recorded at The Fire & The Rotunda (as part of “Gate”, an experimental music series).

Recorded shortly after *The Distance Brings Us Closer*, *Stars Whisper* continues the group’s development of indie ambient sounds & explorations of modern psychedelia. On these songs, blissed out guitars, keyboards used as percussion & long ringing bass notes join with samples stretched beyond their limits, disassembled wind instruments, electronic children’s toys, pellets, shells, & other electro acoustic elements to make the sound of a sunken ship resurrected & propelled into space.

Two of the songs were recorded by the band, using a portable field recorder, & the third song was recorded by War Games (aka Ed from Hotel Hotel), also using a portable field recorder. There is no overdubbing or post-production on any of the tracks.
