

REMORA

My Brother's Guns & Knives

“My Brother’s Guns & Knives” started like so many of Remora’s narrative songs, in a dream. A revolutionary escapes from the aliens occupying the Earth & runs to his brother’s rural home. Realizing he’s putting his brother & his family at risk, he steals weapons from his brother to face the aliens alone. Planning to destroy an army of thousands single handedly with inferior technology & a faith in God the story ends as it began, in the middle of things. An example of the post-apocalyptic-pop anthems Remora has been working on for sixteen years now & the pick for a single from the album **Scars Bring Hope**, it went out to friends for remixing.

Remixes can be an odd beast. Often they’re changing a guitar solo or turning up the kick & snare on the drums. So when it came time for Remora to put together a remix collection for the single “My Brother’s Guns & Knives” they went a different route. Instead of contacting people involved with dance music, experimental & drone musicians were contacted. The result is a collection of thirteen re-inventions of the same track different enough to be covers (in fact one is a cover) or derivative works instead of easily recognizable as the source material. From music concrete to drone ambient to new wave to the post punk of the original song can all be heard in this collection.
