

December is the debut release from the doomgazing duo Magi. Brandon Helms (From Oceans To Autumn) & Justin Hope formed Magi in early 2011. Building upon musical influences like Isis, Ocean, & Fear Falls Burning to name a few; Magi's purpose is to explore & create epic landscapes of doom-laden drone metal. Constantly changing & ever evolving, Magi does not rely on computer generated synth sounds or samples, but uses electric guitars & acoustic drums & percussion & of course lots of effect pedals to create their worlds of ominous sound. But despite all of these sonic references, Magi's main influence is a search for the deeper meaning of Freemasonry & its mysteries.
