

firetail

learning to cheat

Firetail is Andrea Vascellari, best known for his slowcore project Lullabier that has shared the stage with the likes of Rivulets, Low, Jessica Bailiff, & Boduf Songs. With Firetail he approaches music differently, instead of a minimalist singer-songwriter approach, he uses guitars & effect processors to build soundscapes. I know, it sounds like a natural fit for Silber & it is. In the vein of Aarktica, If Thousands, Thorn1, & mwvm, Firetail brings another take to the guitar driven ambient drone Silber has been known for since the 1990s. Peaceful & melancholy, lethargic & hopeful, lost & found. A warm blanket & lost friend waiting on the sea shore.
