

RLLRBLL

bathing music

Bathing Music is an ambitiously diverse release of psychologically gnawed songs that range from melodic, piano-driven aches to jazz-damaged, decaying-cabaret smokers to blurred electronic-inflected soundscapes, as assembled by clarinet, bass, drums, trumpet, keys, accordion, voice, & samples.

~ Insound

I first found out about Rllrbll (Rollerball) because of trading zines (QRD & Starbage Hands) with Shane DeLeon Sauers. Rllrbll was the first band I knew of with jazz influences that was part of my generation & doing something really interesting with the set of tools in the genre.

In 2000 when Silber was starting to make a name for itself, Rllrbll's *Bathing Music* came out on Road Cone & was getting radio play & reviews in all the same outlets as the drone & noise we were putting out. We're happy to bring this long out of print & hard to find album back in front of the masses. Sit back, relax, groove out, & freak out like it's the first time.
