GODDAKK

praises to my devourer

Goddakk is the experimental guitar project of Martin Newman of Plumerai & DRLNG. We're super happy that Silber has been the home for all four Goddakk releases & to have Goddakk as the first project with a second installment on our 5 songs in 5 minutes EP series.

On *Praises to My Devourer* Newman pushes his guitar sounds beyond the shoegaze wall into total mutations & mutilations. Is the sound a broken music box or a guitar? Is the sound electronics or guitar? On *Praises* the answer is always guitar.
