

Frank Alexander

5x5

Bassist & composer Frank Alexander has been playing, performing, recording, & thinking about all things music for nearly 30 years. Today he splits his time between performing across the Triangle with his eclectic prog-rock trio Triplicity, handling audio production work through his business Luz Gruv Productions, & instilling a deep-seated love for music via his teaching gigs in Chapel Hill & Apex.

The five songs on 5x5 represent a chance for Frank to work mostly with his first love, the electric bass, while also displaying the chameleon-like approach to composition that has allowed his music to be placed in various television programs. Music can be many things to many people, so why can't it be a combination of many things too? Hopefully, you'll hear a little something amidst the mix of styles that's just right for you, too.
