

Produces awe-inspiring sights!
 Enables you to actually SEE the paths
 of electrons and alpha particles
 traveling at speeds of more than
 10,000 miles per SECOND! Electrons
 racing at fantastic velocities
 produce delicate, intricate paths of
 electrical condensation—beautiful
 to watch. Assembly kit includes:
 Dri-Electric Power Pack, Deionizer,
 Compression Bulb, Glass Viewing
 Chamber, & Tubings!

SAGAN YOUTH CHEM SET

Sagan Youth have traveled many light-years & have many more to go. Inspired in equal parts by the prophetic ramblings of Carl Sagan & the brilliance of Moog synthesizers, Sagan Youth makes primitive dance music to make your body move.

In the five minute expanse of *Chem Set*, Sagan Youth tell the tale of electrons paths from creation in the nuclear furnace of a sun to the medium for experiencing reality as we know it & back again.
