

small life form

it is not safe but it is warm

Since 1998 Small Life Form has been conducting sound experiments involving electro-acoustics, super simple synthesizers, drone, & aggressive ambient embracing the nature of sound as one is submerged into it, allowing failed concepts (an optical theremin reacting to Christmas lights) to allow new ones to rise (unshilded cable wrapped in Christmas lights).

Just in time for Christmas, Small Life Form delivers a pure slab of aggressive ambient drone. Just like home, *it is not safe but it is warm*. Jesus is coming to love & destroy us all.
