

Electric Bird Noise

Nighttime Tides

For nearly twenty years Electric Bird Noise has stood tall reflecting stage lights off sunglasses & guitar strings throughout the south. Ambient angst, melancholia, darkwave, goth, space rock, post rock, shoegaze, who knows how to pigeonhole a sound more consistent than the labels put on it?

For *Nighttime Tides*, Electric Bird Noise presents a soundtrack for the ocean rolling in. Calming, soothing, repetitive, lulling, but hinting at a sleeping power of destruction. Will tonight be the night the waves crush coastal towns while we sleep? While we're dreaming do we even care if we're destroyed or somehow saved by the creatures of the deep? As long as a guitar string can still create soothing melodies it doesn't matter if it's underwater....
