

The Moonflower is a murder mystery play by creative powerhouse Philip James Fox (Wicked Gift, *Gratisphere*) & the Electric Bird Noise soundtrack is essentially a greatest hits collection covering the past seven years of the band. Nearly every musical side of Electric Bird Noise is represented, from discordant ambient jazz structures (“owt ytriht”, “neves”) to synth pop (“carnegiea gigantean”, “peter hook”) to ambient drone (“welcome to static beach”) to darkwave (“i come from the earth”) to electro (“i miss those hardcore kids”). Sit back & solve a murder mystery or how all of these songs come from the same project.
